

Spain Field Data Collector

Description

Takimada is an Annotation Services company that helps AI companies to achieve a “better set of data” using our propriety processes.

Sales Career Opportunity for University Students

Our company is looking for student team members to join our Data Logistics team, which is responsible for collecting data from sales points through our mobile application and updating this information via the web to support our machine learning process developed for our customers. This is a great opportunity for students who are interested in a sales career and want to gain experience in an exciting field like machine learning.

Responsibilities

- Collect information about consumer products (name, packaging, size, etc.) using a mobile application by visiting retail stores in channels such as supermarkets and pharmacies.
- Organize the information collected from the field through the web.
- Perform data labeling on a computer for the machine learning process.

Qualifications

- Be enrolled in a university or higher education program.
- Be proficient in using mobile and web applications.
- Be proficient in using Excel.
- Have good verbal and written communication skills.
- Be able to visit stores using public transportation.
